

Windows 7: Disk Cleanup (free some space)

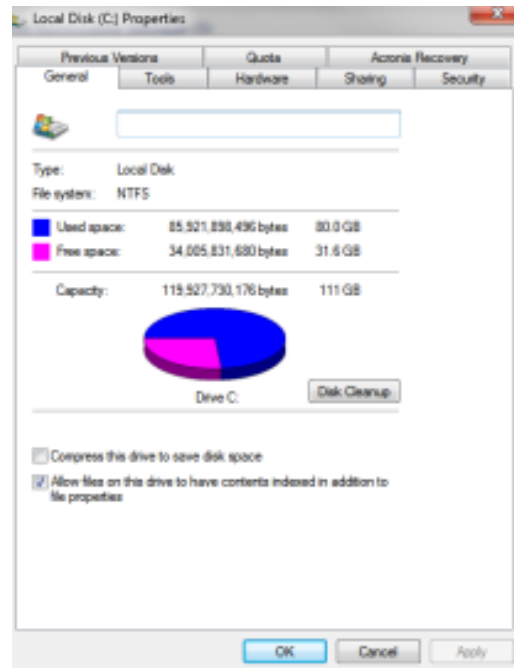

To run this utility, open “My Computer” and right click on the icon for your **C: drive (Local Disk)**

You will have a list of options - left click on “Properties”.

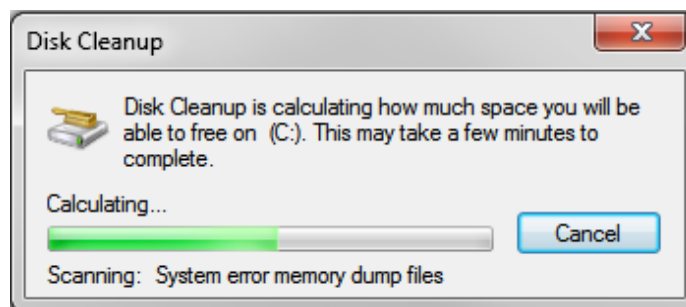

This window will appear...

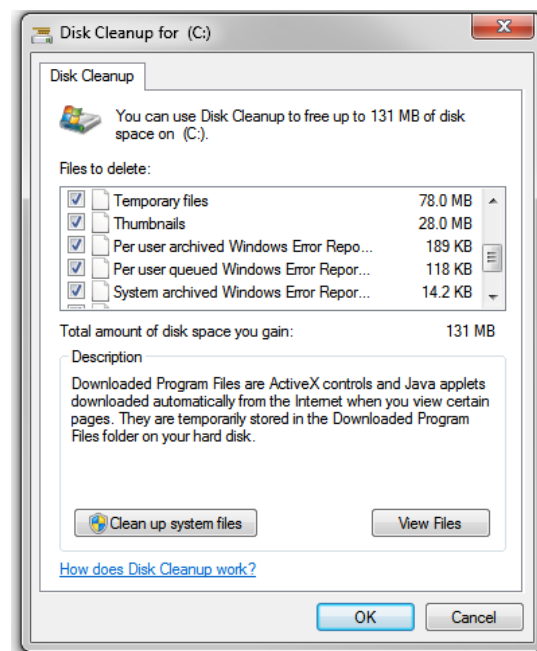

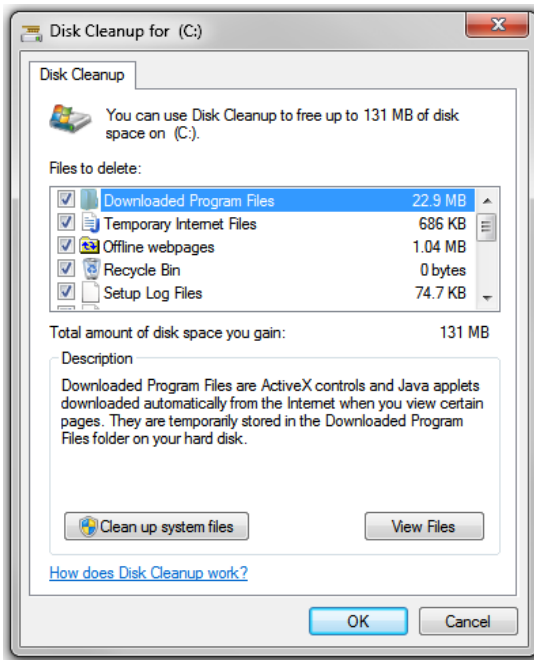

Now click on "Disk Cleanup"

This screen will show

When the scan is complete you will be given a list of items that you can change or delete on your system. It is advised that you only tick the items that are shown below. If you do select any other options and there is a detrimental effect on your computer we cannot be held responsible for this effect.

If you have any doubt about any of these operations please ask for professional help with the maintenance of your PC.

At Quad, we understand how important PCs and Servers are to keep your business running. We try to ensure that the people we work with get the best out of the equipment they have and that they get the right tools for the job in hand.
